

Sex and Gender Definitions

Sex assigned at birth

Please enter the sex that appeared on your original birth certificate. This is important in advising you about health maintenance and routine screenings.

Gender identity

This may or may not be the sex assigned at birth or the sex listed on your identification documents. Your care team needs this information to address you respectfully and provide the care you need.

Preferred name

This name will appear along with your legal name in your medical record and on correspondence with and about you.
